

Environmental Policy

3rd Floor
19 North Street
Portslade
BN41 1DH

P H Beck LTD is a construction company that operates from East Sussex, England.

P H Beck is committed to caring for and protecting the environment in which we operate, by pursuing a responsible and proactive attitude to improving environmental performance across all of our business activities by providing unparalleled standards and quality of service to all of its customers.

We believe that this can and must be done in a way, which protects and enhances the environment. It is a fundamental part of our business policy that we should aim to avoid losses and maximise benefits.

It follows that we must minimise adverse environmental effects arising from our business activities and promote a positive attitude to the conservation and enhancement of all aspects of our environment.

Environmental factors will be taken into consideration in our business planning and decision making.

P H Beck LTD will comply with, and where possible exceed, the legal and other requirements to which we subscribe, in relation to environmental aspects of the business.

Within our business activities we will endeavour to set an example of responsible Environmental Management and conservation, including active re-cycling of materials wherever practical. The company will comply with all the relevant legislation and adhere to the principles of the prevention of pollution during design and operational performance.

Arrangements to achieve these targets include the following:-

- Awareness and use of appropriate technology for the conservation of energy.
- The use of materials from sustainable and responsibly managed sources, which do not necessarily pollute or deplete the world's natural resources.
- A purchasing procedure taking into account environmental impacts.
- Minimise the use of non-sustainable natural resources.
- Minimise waste through an effective waste management system.
- Raise awareness of environmental issues through training and development of all employees, and encourage initiatives that enhance environmental performance.
- Actively engage with clients, subcontractors, and suppliers to reduce the environmental impact of projects, increase knowledge and improve their environmental performance.
- Undertake regular audits and annual reviews of the effectiveness of this Environmental Policy and its associated procedures, measurement methods, objectives and targets and the progress towards meeting those objectives and targets.

This policy is supported by the board of directors and is given effect through an in-house environmental management system (EMS). We held ISO14001 certification from February

2018 – February 2024 and will continue with our environmental objectives and processes we have in place to the standard.

We will encourage each and every employee within the company to follow our example, to take a personal responsibility for environmental protection and enhancement within their own sphere of responsibility to standards that are commensurate with the high standards set by the company.
